

# TOMBALL ARCHAEOLOGICAL RECOVERY CLUB

# THE ROOSTER

VOLUME 4 SEPTEMBER 2009

WWW.TOMBALLMDCLUB.COM

Welcome to the TARC Monthly Newsletter : *The Rooster*. You will find information from last month's meeting, details on upcoming hunts and coin shows, results from last month's judging, funnies, current news, and maybe even a few spelling errors.

If you're visiting for the first time...WELCOME! We'd love to know how you heard about us, and most importantly we'd love to know more about you!

If you're a returning guest, welcome back!

If you have a story or article you'd like to include in *The Rooster*, let Tiffany or Charles know at least a week before the next TARC Meeting.

Please, feel free to visit our website to learn more about us and what we do. We hope to see you again next month!

## Friendly Reminders

- Our next meeting will be October 6, 2009 at 7:00 p.m. in the Tomball Community Center.

## September's Birthdays

- Tim Gage - 12th
- Blaine Sanders - 20th
- Tiffany Dieringer - 25th

## What's Cluckin'?

### Turn Your iPhone Into a Metal Detector!

On the beach with your family or just walking around town? You probably could use some extra cash. Whip out that iPhone 3GS and see if you can track down some metal. With this handy little app released by GP Imports, 3GS owners can use the phone's internal compass to sense strong magnetic fields (other than the north pole), thus pointing to metals. The app allows you to see how strong a magnetic field actually is and adjust the sensitivity of your detector, so you won't get stuck digging for mere chump change. The app costs \$0.99 and is available for download at the iTunes Store.

### Metal Detecting Sandals

Hammacher Schlemmer today added to its catalog [The Metal Detecting Sandals](#) (\$59.95), wearable metal detectors that let you find buried treasure with your feet. The Metal Detecting Sandals, according to a press release, have a "copper coil built into the right sandal--powered by a battery pack that straps to your calf by an elastic band." The sandals use what's called "beat frequency oscillation technology" in order to create a magnetic field. The 9V battery pack then alerts the wearer of metal up to 2 feet underfoot via flashing red LED lights and either a vibration or an audible buzz. Providing up to 6 hours of use on a single charge, the sandals have PVC uppers, non-skid soles, and polyurethane foam footbeds; they are available in two unisex sizes.

## Upcoming Events in September
